

System Counts by System Types

09/23/2024 2:31 pm EDT

You can use the script below to find how many systems of each type there are in Sedona Office

```
select b.system_code as System Type,  
b.inactive as "System Code Inactive Y/N",  
count(a.system_id) as "Number of Systems"  
from ar_customer_system a, sy_system b  
where a.system_id=b.system_id and a.Customer_Id > 1  
group by b.system_code, b.inactive, a.system_id  
order by b.system_code
```
