

# Duplicate Warehouses showing in Drop-down Lists

09/23/2024 2:01 pm EDT

## Issue:

When using the Material Handler option in the Inventory setup, users are seeing multiple duplicate Warehouses in the screen drop down lists.

## Resolution:

This will happen if there are duplicate entries for the warehouse and employee in the IN\_Material\_Handler\_Warehouses table.

--- Find the User\_Id ---

```
select * from SY_Employee e
```

```
inner join SY_Users u on u.User_Id = e.User_Id
```

```
where u.User_Code = 'BSP'
```

--- Find the Warehouse\_Id ---

```
select * from IN_Warehouse where Warehouse_Code = 'ABC Service Co'
```

--- Find the Material Handler Records ---

```
select w.Warehouse_Code,Employee_Id,h.Warehouse_Id,*
```

```
from IN_Material_Handler_Warehouses h
```

```
inner join IN_Warehouse w on w.Warehouse_Id =h.Warehouse_Id
```

where h.Employee\_Id = 59

	Warehouse_Code	Employee_Id	Warehouse_Id	Material_Handler_Warehouse_Id	Employee_Id	Warehouse_Id
1	ABC Service Co	59	20	240	59	20
2	ABC Service Co	59	20	241	59	20
3	ABC Service Co	59	20	242	59	20
4	ABC Service Co	59	20	243	59	20
5	ABC Service Co	59	20	244	59	20
6	ABC Service Co	59	20	245	59	20

You should remove all but one record for each warehouse.

--- Backup the Material Handler Records ---

Select \* into IN\_Material\_Handler\_Warehouses\_Backup from IN\_Material\_Handler\_Warehouses

--- Delete extra Material Handler Records ---

Delete from IN\_Material\_Handler\_Warehouses

where Material\_Handler\_Warehouse\_Id in(241,242,243,244,245)
