

A Referral Was Returned from The Server Installing Updates

09/30/2024 1:09 pm EDT

Issue:

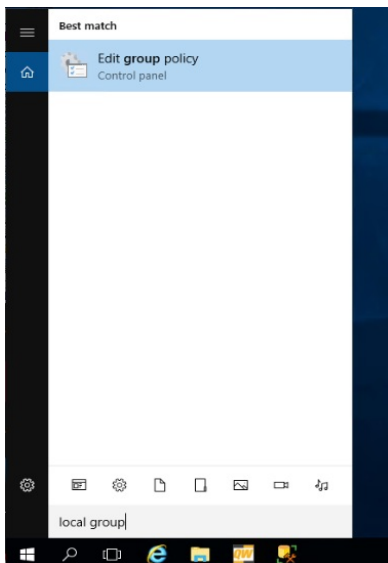

Trying to install the SedonaOffice Update and we are receiving an error, "A Referral Was Returned from The Server Installing Updates".

How can this be corrected.?

Resolution:

You can check the Local Group Policy.

Open Local Group Policy Editor

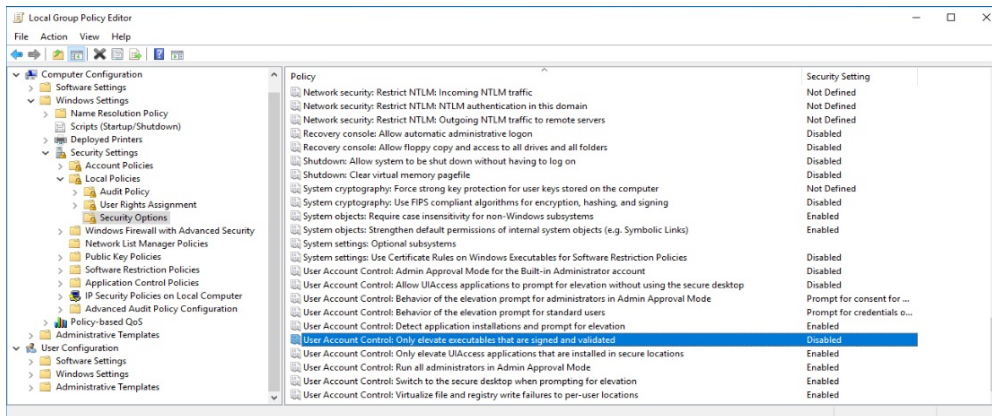

Under Computer Configuration select Windows Settings > Security Settings > Local Policies > Security Options"

Under the Options check the setting below.

“User Account Control: Only elevate executables that are signed and validated”

Set this to "Disabled".

Restart Computer.
