

# Script to List Functions in a Database (Internal)

11/22/2024 10:29 am EST

## Issue:

Is there a way to get a listing of the functions used in a database?

## Resolution:

The Function in a database can be listed using the SQL query below.

```
SELECT O.name, M.definition, O.type_desc, O.type
FROM sys.sql_modules M
INNER JOIN sys.objects O ON M.object_id=O.object_id
WHERE O.type IN ('IF','TF','FN')
```
