

In Process Flag on Cycle Batch

12/05/2024 8:38 am EST

Issue:

When trying to post or edit a cycle batch the message below is received.

How can we post or edit the batch?

Resolution:

When posting a batch, the In Process flag gets set to prevent users from trying to edit the batch during the posting process. If there is an issue when the posting is in process, the flag can get stuck as Y so the batch cannot be reposted or modified.

To post the batch, you can reset the In Process Flag.

Click on the batch to highlight it.

Right click on the record and select Change In Process Flag.
