

# Error Running AP Retroactive Aging Report (Internal)

12/18/2024 11:42 am EST

On export, you may receive this error:

This was determined to be caused by items in the AP\_Invoice table having a null in their Due\_Date.

Run:

Select \* from AP\_Invoice where Due\_Date is null

That should reveal the records with a null value. Then run:

Update AP\_Invoice

Set Due\_Date = 'Whateverdate is correct'

Where Invoice\_Id = ReplaceWithID

That should correct the null value and allow the report to export correctly.
