

# 214.... Errors

01/06/2025 3:13 pm EST

Errors in Sedona Office sometimes come with a prefix that begins with a list of numbers. Unfortunately, these numbers do not have a subtle meaning. They are left over from error coding and there's no discerning one from another. They are all indicating a program error that is not a Run-Time Error, but there's no additional meaning to the error numbers.
