

How to Fix Registration Code Error Message when Updating Customer Data

07/17/2025 5:46 pm EDT

Error messages pop up from time to time in the software. Below are steps on how to fix the Error Updating pop-up when trying to save data in a customer setup.

Overview

The steps below assume the user has the correct permission and are only for the specific error message pop-up shown.

Steps:

1. When the error message pops up, click on the OK button to clear the pop-up.
2. Look at the Registration Code area in the Setup Information Tab. If blank, click on the Refresh Button.

3. After the new code is shown, click on the Save button to save the changes.
