

Sales vs. Revenue vs. Recurring Reporting

07/17/2025 4:34 pm EDT

Sales Reports	Revenue Reports	Recurring Reports
Display all amounts on all invoices for a specified period.	Display all revenue earned during a specific period.	Show all active recurring as of a specified day.

These three numbers will necessarily be different from each other for many reasons. Most commonly recurring was added/edited after cycle invoicing was run, and/or invoices may charge for more than one month, meaning the revenue for the subsequent months has not been earned yet. If there is a large difference you do not expect, that could be worth auditing internally to see what may have changed, but as a rule, it is normal to find these values are not the same.
