

# Troubleshoot FSU - Verify Downloads

07/17/2025 10:23 am EDT

SedonaOffice FSU may have problems because the technician's FSU data is not showing updated information. To verify when the SedonaOffice data was last updated on the FSU application, follow the instructions below:

- Go to the Data Downloads section of the FSU application.
- Click on the "!" – An exclamation mark next to the toggle, which will pull up another screen showing which of the toggle controls to download. You will see a list with the Last Download date and time that particular data was downloaded.
