

How to change the next check number in AlarmBiller?

07/17/2025 9:31 am EDT

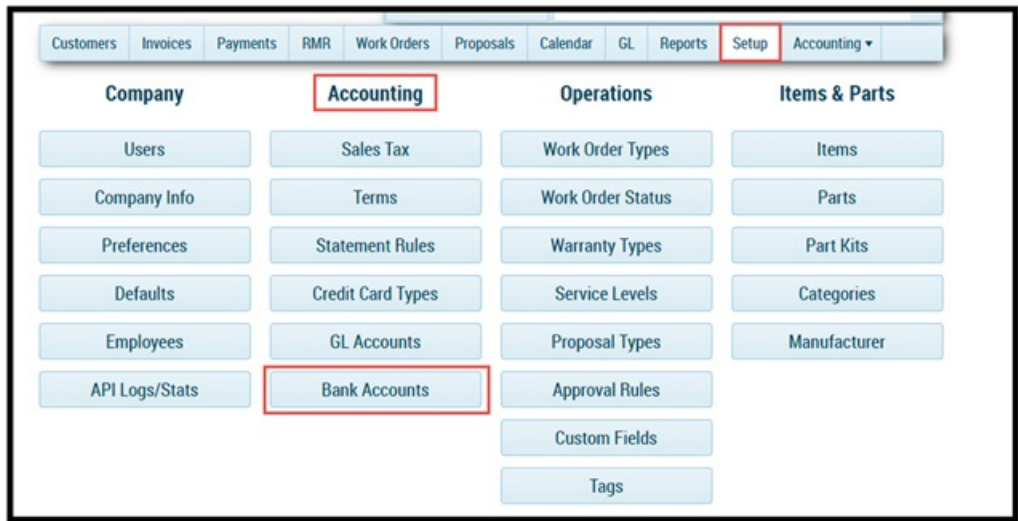

AlarmBiller allows users to change the next check number.

Note: Unlike the next customer number, next invoice number, next vendor number, and next purchase order number, which are all found under Setup -> Under Company -> Defaults, this feature is in a different place.

Follow the steps below to change the next check number.

The next check number can be found under each bank.

In AlarmBiller go to Setup -> under Accounting -> Bank Accounts:

Click on the bank name in blue:
