

SedonaWeb/SedonaAPI 2.0 Release Notes

May 2025

Version 1.50.1 **INTERNAL COPY**

NOTE: This is a preliminary version of the release notes. The listed features are targeted for this release; however, not all features are guaranteed to be in the final release. The final release notes will have the finalized list of features.

SedonaWeb 2.0

Application Corrections

56152 SedonaWeb 2.0 - Processing Full Invoice Amount when Partial Payment/Credit already Applied to Invoice [00132135, 00132172,133150, 135145]

When customers logged into their online accounts and selected to pay an invoice that had a partial payment, advance deposit, or credit applied to it, the system was charging the full amount of the invoice instead of processing the balance due.

We fixed the pay invoice page to use the net payment instead of the total amount.

Special Upgrade/Installation Instructions

If your company uses SedonaWeb 2.0/SedonaAPI 2.0, IT will update the version at the same time as your SedonaOffice upgrade. This is to ensure compatibility with all modules using SedonaWeb 2.0/SedonaAPI 2.0.

.NET Framework 4.8 automatically uses TLS 1.2. TLS 1.2 must be the only TLS version Enabled in the Registry. TLS 1.0 and TLS 1.1 must be disabled. Verify that they are disabled and that TLS 1.2 is enabled.

Supported Environments

- This version of SedonaWeb 2.0/SedonaAPI 2.0 requires SedonaOffice version 6.2.0.19 or later.
- Server (where SedonaWeb 2.0 is installed) has Microsoft .NET 4.8 installed.
